

LUCIDEX

FEATURE LIST · 90-DAY PILOT SCOPE

A digital credential platform connecting universities, students, and employers — scoped for a 90-day pilot.

4

PORTALS

15

FEATURES

36

DEFERRED

ONE LOOP, PROVEN END TO END

This scope strips the platform down to a single trust loop: a university issues a degree, a student claims and shares it, an employer verifies it in one click. Everything that doesn't directly prove that loop is deferred past the pilot.

FOUR PORTALS, ONE CONNECTED TRUST LAYER

- **Issuer** — universities issue digital degrees
- **Student** — graduates claim and share their academic record
- **Verifier** — employers verify candidates in one click
- **Admin** — approves issuers and organizations into the pilot

June 2026

01

Issuer

University / training-office staff who issue digital degrees

4 FEATURES

ACCOUNT

- Register
- Login
- 2FA setup: mandatory for all issuer accounts
- Forgot password/reset

DATA MANAGEMENT

- Upload graduate CSV, with a downloadable template

CLAIM PROCESSING

- Review claims: per-record approval queue — see who's claiming what
- Manual approve: one-click or bulk approval of student claims
- Revoke credential: pull a live credential at any time, with audit trail

MONITORING

- Monitoring dashboard — activation rate, pending claims

ACCOUNT

- Register
- Login
- Notification center: real-time updates on claims, verifications, approvals

CLAIM & ACADEMIC RECORD

- Claim via university email (.edu, issued by the institution)
- Claim via CCCD: national ID fallback for postgraduates without active edu email
- View degree — academic details synced from the issuer's CSV
- Credential list: degrees · certifications — all in one place
- Profile: view and edit personal profile

SHARING

- Create, view, and revoke a verified link at any time
- Consent settings: four modes: one-time · per-request · organization-level · time-bound
- Trusted organization: auto-approve access for pre-designated orgs

TRANSPARENCY

- View audit log — who viewed your record, and when
- Personal dashboard: credentials issued · links active · viewers · verification timeline

- Data deletion: delete individual records or full account — no friction, no lock-in

03

Verifier

Employers and recruiters who verify candidates in one click

4 FEATURES

ACCOUNT

- Organization registration, approved manually by the team during the pilot
- Login
- Status tracking of registration: pending · approved · rejected — resubmit on rejection

VERIFICATION

- Verify a single ID

OPERATIONS

- Dashboard: verification count · history · bar + pie charts
- Audit export: download full verification history for compliance
- Quota & plan: view current usage against plan limits
- Upgrade plan: self-serve upgrade with auto payment

REGISTRATION APPROVALS

- Pending requests: view all incoming Issuer and Organization registration requests
- Request detail: full data before making a decision for one organization registration
- Approve / Reject: with reason logging

REGISTRATION APPROVALS

- System dashboard: verified count · active issuers · active orgs · total students
- Account management: suspend or lock Issuer / Organization accounts for violations
- System-wide audit log: every platform event, searchable and exportable
